

Undet for SketchUp Version 19.0.0.**

This product version is only available on 2017/2018/2019 SketchUp Versions.

We split “Undet for SketchUp + Indexer” installer to two separate installs.

- Undet for SketchUp
- Undet Indexer

What’s New

- Added .NET 4.6 Framework to installer, to run Undet for SketchUp program smoothly.
- Scan data dialog has been improved for easier use.
- Added 4 new features to new “Undet Scenes” toolbar:
 - Save to Scene – Saves to selected scene your Point cloud settings by Coloring settings, Density settings, View section box geometry, Data classes and Visibility.
 - Remove from Scene – Removes all Point cloud settings from selected scene.
 - Export Animation Image Set – Exporting SketchUp Scenes to image set by choosing Resolution, Frames Rate and Antialiasing.
 - Play Animation – Displaying the animation of your created scenes in different Point cloud settings.
- Undet Close project feature has been upgraded by extra message before closing Undet project.
- Added new feature “Export to Layout” – Exporting Point cloud image to SketchUp Layout file.
- Undet Open project feature has been improved by extension filter to see only Undet projects.
- From now unable to delete Clipping box with Erase or “delete” button.
- Installed new “Groups” feature on right mouse button, which helps you to add your selected scan points to Groups.
- Also installed new “Show/Hide/Isolate” features on right mouse button:
 - Show – Activates selected scan position point cloud data
 - Hide – Deactivates selected scan position point cloud data
 - Isolate – Isolates selected scan position point cloud data
- Density Settings dialog has been improved by progress bar only for decimated Point cloud to show how long it takes to generate your Point cloud points from Min to Max.
- Coloring settings dialog has been upgraded.
- Fixes an issues with Coordinate systems dialog.
- Display scale and layout 125%, 150% has been fixed for all Undet dialogs and tools.
- Exporting 2D Graphic with Point cloud in Higher Quality.
- Fixes minor crashes by loading saved Undet projects from oldest SketchUp versions.

A software update can include, but is not limited to:

- New and / or enhanced features.
- Further improvements to performance.
- Bug fixes.
